

**Smart, safe,
and compliant**

Suresite[®]
Wetstock

Take stock of your fuel

Managing fuels is serious business, with regulatory compliance, safety, and the environment at the top of every forecourt's priority list. Regarded as one of the best wetstock management solutions on the market, Suresite is ready to optimise your forecourt safety and performance.

Early detection of stock variances is key, and our innovative technology automatically identifies them in real-time, from leaks in tanks or pipelines, to water ingress or theft. With Suresite Wetstock you can be confident that your obligations are in hand, from delivery to purchase.

Looking after you and your forecourt

The forecourt industry is ever evolving in line with constant regulatory requirements. Our commitment to innovation means our technology and service is future-proofed and flexible – today and tomorrow:

Innovative technology – flexible wetstock solutions. Go deviceless with our software only option or choose Suresite's unique Guardian devices.

Real-time monitoring – a true real-time solution facilitating accurate stock management, variance detection and response.

Premier service – real person, UK based support with subject matter expertise in Wetstock management.

Excellent value – we are the lowest cost to implement solution, helping you optimise margins and save on admin time.

Full regulatory compliance – we'll help make sure you meet regulatory requirements:

- Health and Safety Authority
- Environment Agency
- Petroleum License
- DSEAR* Risk Assessment
- APEA and EI Blue Book** guidance

Protect the environment – with very real and growing challenges for our environment, Suresite Wetstock ensures that you minimise any potential adverse impacts on your local communities and the environment in general.

Suresite Lifetime Warranty for maximum uptime

Suresite include two Guardian devices with every installation - one active and one backup. In the event of a device going down, the backup device can be connected immediately. With no device replacement fees this saves you significant cost and time as well as assurance of continuous monitoring.
